FOREWORD

This gazetteer contains about 40,000 entries for places and features in Yugoslavia. The entries include standard names approved by the Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in the gazetteer in order to accommodate it to the machine method of tabulation.

Name. — Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see." Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used. Names that include specific and other elements (except names of populated places) are alphabetized by specific part; thus Luka Milena is listed as Milena, Luka.

The diacritical marks used in the approved names are the *wedge* (ˇ), which occurs written over the letters c, s, and z, as in *Čačak, Niš, Lož,* and the acute accent (´), which occurs written over the letter c, as in *Peć.* The only special letter is the *barred d* (Đ, đ), as in *Đorđevac.* The diacritical marks and the *barred d* are to be used as indicated whether the names are written in capital or lowercase letters.

In compound names, the name elements written as separate words, with the exception of prepositions and conjunctions, are always capitalized; example, *Gradišče pri Litiji.*

In Yugoslavia some populated places formerly known by a simple specific name are now identified as two or more separate entities, each of which retains the former name but with a qualifying adjective prefix. For example, Donji Lipovčani and Gornji Lipovčani replace the former Lipovčani. When a place cannot be found listed under the former name, it may be found under one of the following terms:

Donji, Donja, Donje (lower)
Gornji, Gornja, Gornje (upper)
Mali, Mala, Male (little)
Novi, Nova, Nove (new)
Spodnji, Spodnja, Spodnje (lower)
Srednji, Srednja, Srednje (middle)
Stari, Stara, Stare (old)
Veliki, Velika, Velike (big)
Zgornji, Zgornja, Zgornje (upper)

Designation. — The second column contains designations or abbreviations of designations, as listed below. Since practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in this gazetteer are stated for many terms in the list to reduce ambiguity. The distinctions that can be made by the designations in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that have names.

ADMD administrative division (*narodna republika,* peoples republic; *autonomna . . . oblast* and *autonomna pokrajina,* autonomous region; *srez,* district; *opština,* indicated by absence of generic term in name, commune)

Latitude and longitude. — Coordinates, in the third and fourth columns, are for finding purposes only. They were generally read to the nearest minute. For precise location, large-scale maps should be used.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of streams, at one end of canals, at the summits of mountains and hills, at the extremities of capes, near the centers of areas, and at the midpoints of most other features.

Area number. — The number in the fifth column indicates the administrative or geographic unit in which the place or feature is located, as listed below.

Yugoslavia is made up of six first-order administrative units, each a *narodna republika,* "peoples republic" as listed below. Srbija contains two autonomous areas, namely the Autonomna Pokrajina Vojvodina and the Autonomna Kosovsko-Metohiska Oblast. The peoples republics and the autonomous areas are subdivided into two types of unit, the *srez* and the *opština.*

37200 Yugoslavia (General)
37210 Slovenija (Slovenia)
37220 Hrvatska (Croatia)
37230 Bosna i Hercegovina (Bosnia and Hercegovina)
37240 Crna Gora (Montenegro)
37250 Makedonija (Macedonia)
37260 Srbija (Serbia)

The general number 37200 is used for features common to two or more first-order administrative units and for international features.

Locational reference. — The number in the last column indicates a map, chart, or other source on which the feature may be located by its standard name or a recognizable variant of its standard name.

though the additional names in them are not necessarily those that would be approved by the Board as standard names:

1. *Imenik Mesta: Pregled Svih Mesta, Opština i Srezova u Jugoslaviji sa Poštama i Teritorijalno Nadležnim Sudovima i Javnim Tužioštvima,* second, revised and enlarged edition, Izdanje "Službenog Lista FNRJ," Beograd, 1960; civil divisions and an alphabetical list of some 30,000 populated places.
2. *Yugoslavia: Index Gazetteer Showing Place-Names on 1:100,000 Map Series,* Survey Directorate, General Headquarters, Middle East, Cairo, 1944; 11 vols. Name, designation, grid references, and sheet number for each place and feature on the 1:100,000 GSGS 4396 series.

Reporting of errors

It is requested that all who use this gazetteer aid in its correction for future printings by reporting errors to the Board on Geographic Names, Department of the Interior, Washington 25, D. C. A statement of the source of the correct information will be helpful.

Geographic names or their spellings do not necessarily reflect recognition of the political status of an area by the United States Government.
